#### PRODUCT DESCRIPTION

Blixem Electrical Cleaner is a premium quality high performance penetrating mixture that penetrates and lubricates all types of electrical parts that have become difficult to operate due to increased corrosion or the build-up of sludge and grime. It is blended from a unique formula that contains chlorinated solvents, paraffinic hydrocarbons, and corrosion inhibitors.

#### BENEFITS

- Rapid removal of rust and grime and other carbon deposits.
- Rapid penetration into the electrical components such as armatures and rusted electrical boards to increase conductivity.
- Superior rust busting characteristics.
- Formation of a film lubricant to protect against rust and corrosive build up.
- Formation of a protective film that rejects abrasive particles such as dirt, sand, and salt.
- Formation of a protective shield against moisture.
- Excellent displacement of any moisture builds up.

#### APPLICATION

- Electrical cleaner is used to penetrate all types of electrical parts to increase equipment life and to improve conductivity and reduce costly downtime caused by worn or dirty electrical components.
- Electrical cleaner is perfect for use on electric power tools, electrical air tools, transformers and electrical motors.

#### DIRECTIONS FOR USE:

- Agitate before use.
- First scrape with soft brush. Allow a short time to penetrate.
- Wipe away any accumulated dirt or grime that may appear.
- Apply with a soft paint brush to penetrate awkward spaces.
