## TECHNICAL DATA SHEET ATF DX VI

### PRODUCT DESCRIPTION

ATF DX VI is a fully synthetic transmission fluid especially developed for automatic transmissions of General Motors. It is also suitable for power steering systems and some hydraulic systems where a good low temperature fluidity is required. It is blended with additive chemistry that combines friction durable, ensuring excellent clutch friction performance over many transmission miles, with a shear stable dispersant polymethacrylate (dPMA) viscosity index improver.

### PERFORMANCE STANDARDS

- JASO 1A
- Toyota T-IV
- Nissan matic J
- Mitsubishi SP -III

### BENEFITS

- Enhances the performance of new and older GM transmissions.
- Provides consistent shift performance for the life of the vehicles.
- Extends transmission fluid life and prevents fluid breakdown at higher operating temperatures
- Provides excellent oxidative stability under severe conditions.
- Reduces sludge and varnish build up.
- Protects transmission gears and allows them to operate smoothly.
- Maintains lubricity.
- Flows well for cold startup.
